## Safire® Fire Rated Roof Deck Profiles

- **Providing upto 120 minutes fire resistance in accordance with BS476 part 20**
- **Supplied pre-cut and ready to fit**
- **Available to suit all common roof deck profiles**
- **Fast turnaround**

Used to provide a fire barrier for cavities between masonry walls and profiled roof decking, Safire® Roofdeck Profiles provide either 1hr or 2hrs integrity and insulation at compartment junctions.

Safire® Roofdeck Profiles are cut to order and supplied ready to fit in either 75mm (1hour) or 100mm (2hours) depths.

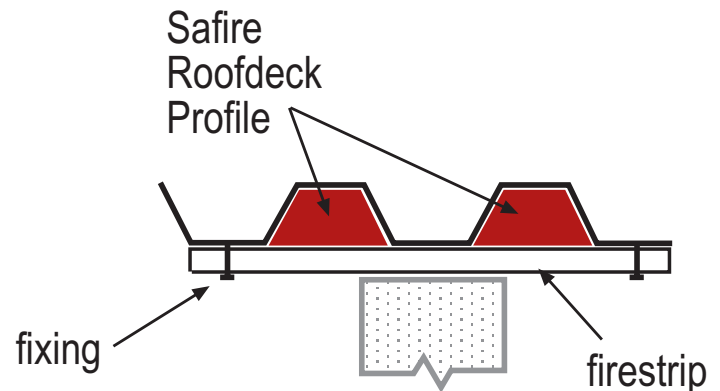

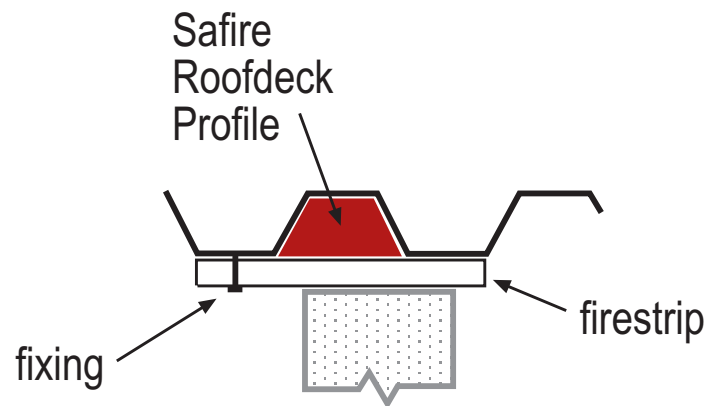

**60/120**  
mins

# Safire® Fire Rated Roof Deck Profiles

## INSTALLATION

Safire® Roofdeck Profiles are pre-cut to size and simply require a push-fit installation into the roofdeck profile cavity. A rectangular or linear firestrip is available and should be used to pack out the space between the top of the wall and the roofdeck profile.

Any gaps should be sealed with Safire® Intumescent Mastic.
