Fire Rated Fire Pillows

120
mins

Fireus fire rated Fire Pillows are used to create temporary or permanent fire barriers in walls and floor/ceiling structures. They are suitable for use on concrete, masonry, porous concrete wall constructions and concrete floor constructions. They can also be used to seal around cables in fully enclosed metal cable trays/cable trunking and ducting.

- 2 hr fire rating
- Tested to BS 476 Part 20:1987
- Simple to install, remove and replace
- Maintenance free
- Contain no respirable fibres
- Unaffected by moisture, condensation or humidity

Large	330mm x 200mm x 45mm
Small	330mm x 200mm x 25mm
Sausage	330mm x 50mm x 20mm

* sizes may vary slightly but volume of material remains constant

Fire Rated Fire Pillows

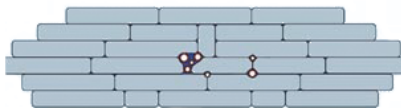

120 mins

The staggering of joints between layers of fire pillows is essential with a minimum overlap of 25mm recommended. Fire Pillows contain no respirable fibres and are unaffected by moisture, condensation and humidity.

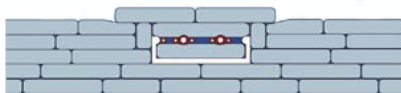

Typical applications:

- **Concrete, masonry and porous wall constructions**
- **Concrete floor construction**
- **Fully enclosed metal cable trays & ducting**

Horizontal & Vertical Packing

Cable Tray Application

- **Manufactured using water resilient glass fibre woven cloth**
- **Provide limited insulation to services when used in conjunction with fire bags**
- **Active material contained within protective polyethylene sleeve**
- **Service temperature conditions -20°C to 130°C**
- **Suitable for internal and external conditions**
- ✗ **Not suitable for use in dry-lined applications or be submerged in water**
