

## SAFIRE FIRESCREEN SILICONE SEALANT

REVISION 0  
ISSUE DATE January 2014

### Section 1: Identification of the Substance/Mixture and of the Company

1.1 Product: Safire Firescreen Filicone Sealant

1.2 Application: An elastic, neutral cure, single component, fire resistant silicone sealant for internal and external uses. Application by sealant gun.

1.3 Product type: Gap sealant

1.4 Company/undertaking identification:

Fireus Ltd.  
6 Thetis Road  
Lune Industrial Estate  
Lancaster  
LA1 5QP  
tel: 01524 388898  
fax: 01524 383724

### Section 2: Hazards Identification

Slightly irritating to eyes, respiratory system and skin.  
According to EC criteria, the product is not classified as a hazardous preparation.

### Section 3: Composition/Information on Ingredients

Ingredients: Blend of Polydimethylsiloxanes, amorphous silica, fillers, additives & crosslinker.

#### Hazardous components:

Substances presenting a health hazard within the meaning of the CHIP regulations or which are assigned Occupational Exposure Limit values:

Name	Conc.Range	CAS No.	Symbol*	R-Phrases*
Vinylsilane trimetghoxy	< 5%	2768-02-7	Xn R	R10, R20
Titanium tetrabutanolat	< 2%	5593-70-4	Xi	R10, R38, R41

During use, on contact with humidity in the air, the following are released:-

Methanol	max.3%	67-56-1	F T	R11,R23/24/25, R39/23/24/25
1-Butanol	< 2%	71-36-3	Xn	R22, R37/38, R10,R41, R67

\*for full text see section 16.

HEALTH & SAFETY DATA SHEET

### Fireus Ltd.

HEALTH & SAFETY DATA SHEET

#### Section 4: First Aid Measures

- General:** In all cases of doubt or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person.
- Inhalation:** Remove to fresh air, keep patient warm and at rest. If breathing has stopped, administer artificial respiration. Give nothing by mouth. If unconscious, place in the recovery position and seek medical advice.
- Skin Contact:** Remove contaminated clothing. Wash skin thoroughly with soap and water or a recognised skin cleaner. **DO NOT USE SOLVENT OR THINNERS.**
- Eye Contact:** Contact lenses should be removed. Irrigate copiously with clean, fresh water for at least 10 minutes holding eyelids apart, and seek medical advice.
- Ingestion:** If accidentally swallowed wash out mouth with water and obtain immediate medical attention. Keep at rest. **DO NOT** induce vomiting.

#### Section 5: Fire-Fighting Measures

**Recommended:** Alcohol resistant foam, CO<sub>2</sub>, powder, water spray/mist.  
**Not to be used:** None known

**Recommendations:** As the products contain combustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section 10). Exposure to decomposition products may be a hazard to health. Appropriate self contained breathing apparatus and protective clothing should be worn. Cool closed containers exposed to fire with water spray. Do not allow run off from fire fighting to enter drains or water courses.

#### Section 6: Accidental Release Measures

Exclude non essential personnel. Avoid breathing vapours. Refer to protective measures listed in sections 7 and 8. Collect spillages and place in a suitable container for disposal in accordance with the waste regulations (see section 13). Do not allow to enter drains or water courses. If the product enters drains or sewers, the local water company should be contacted immediately; in the case of contamination of streams, rivers or lakes, the relevant Environment Agency.

#### Section 7: Handling and Storage

**7.1 Handling:** Avoid contact with skin and eyes. Smoking, eating and drinking should be prohibited in areas of storage and use. For personal protection see Section 8. Keep containers closed when not in use. Ensure good housekeeping and regular safe removal of waste materials.

**7.2 Storage:** Observe label precautions - Store between 5°C and 25°C in a

dry well-ventilated place. Keep away from sources of ignition and direct sunlight.

Store separately from oxidising agents and strongly alkaline and strongly acidic materials. Keep out of reach of children.

## Section 8: Exposure Controls/Personal Protection

### Engineering measures:

Provide good ventilation during application and drying. Avoid inhalation of vapours by the provision of good ventilation. If this is not sufficient to keep airborne concentrations below the relevant Occupational Exposure Limit, suitable respiratory protective equipment must be worn

### Personal protection:

All Personal Protective Equipment (ppe), including Respiratory Protective Equipment (rpe), used to control exposure to hazardous substances must be selected to meet the requirements of the COSHH regulations.

### Respiratory protection:

If exposure to hazardous substances identified in section 8 cannot be controlled by the provision of natural ventilation exposure should be controlled, where reasonably practicable, by the use of mechanical exhaust ventilation; when this is not reasonably practicable, suitable respiratory protective equipment must be worn.

### Hand protection:

When skin exposure may occur, advice should be sought from glove suppliers on appropriate types and usage times for this product. The instructions and information provided by the glove supplier on use, storage, maintenance and replacement must be followed. Barrier creams may help to protect exposed areas of skin, but are not substitutes for full physical protection. They should not be applied once exposure has occurred.

### Eye protection:

Eye protection designed to protect against liquid splashes should be worn.

### Skin protection:

Cotton or cotton/synthetic overalls are normally suitable. Grossly contaminated clothing should be removed and the skin washed with soap and water or a recognised skin cleaner. ALWAYS WASH YOUR HANDS BEFORE EATING, SMOKING OR USING THE TOILET.

## Section 9: Physical and Chemical Properties

Physical state:	Thixotropic paste
Odour:	slight
Flash point:	117oC (closed cup)
Specific gravity:	1.35-1.45 @ 25oC
Solubility in water:	immiscible

HEALTH & SAFETY DATA SHEET

HEALTH & SAFETY DATA SHEET

#### Section 10: Stability and Reactivity

Stable under the recommended storage and handling conditions (see section 7). In a fire, hazardous decomposition products such as smoke, carbon dioxide and carbon monoxide may be produced. Keep away from oxidising agents and strongly alkaline and strongly acidic materials to prevent the possibility of an exothermic reaction.

#### Section 11: Toxicological Information

Not classified as harmful if swallowed (by calculation).

The product has been assessed following the conventional method in CHIP and is classified for toxicological hazards accordingly. This takes into account, where known, delayed and immediate effects and chronic effects of components from short and long term exposure by oral, inhalation and dermal routes of exposure and eye contact. See sections 3 and 15 for details of the resulting hazard classification.

#### Section 12: Ecological Information

There is no data available on the preparation itself. According to data on the components, it is considered to be: Not Biodegradable, Not potentially Bioaccumulable and Not have any known adverse effects on aquatic organisms tested.

It is not classified as Dangerous for the Environment according to EC criteria. Do not allow to enter drains or water courses or be deposited where it can affect ground or surface waters. The product is insoluble in water.

#### Section 13: Disposal Considerations

Do not allow to enter drains or water courses. Wastes, including emptied containers, are controlled waste and should be disposed of in accordance with regulations made under the 'Control of Pollution Act' and the 'Environmental Protection Act'. Using information provided in this data sheet, advice should be obtained from the relevant Environment Agency whether the Special Waste Regulations apply.

#### Section 14: Transport Information

Transport within the users premises: Always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Onward transport subsequent to purchase: Transport to be in accordance with ADR for road, IMDG for sea and ICAO/IATA for air.

Proper shipping name:

This product is not classified as dangerous for carriage.

#### Section 15: Regulatory Information (Supply & Labelling)

The product is determined as not being dangerous according to the CHIP Regulations. However, the following precautions should be observed:

##### S Phrases:

- S2 Keep out of reach of children
- S24/25 Avoid contact with skin and eyes
- S26 In case of contact with eyes, rinse immediately with plenty of water and if necessary seek medical advice
- S28 After contact with skin, wash immediately with plenty of soap and water or a recognised skin cleaner
- S51 Ensure good ventilation during application and while drying

The information contained in this safety data sheet does not constitute the users own assessment of workplace risks as required by other health and safety legislation. The provisions of the Health and Safety at Work act and the Control of Substances Hazardous to Health regulations apply to the use of this product at work.

#### Section 16: References

##### RISK PHRASES used in section 2

- R10 Flammable
- R11 Highly flammable
- R20 Harmful by inhalation
- R22 Harmful if swallowed
- R23/24/25 Toxic by inhalation, in contact with skin and if swallowed
- R38 Irritating to skin
- R37/38 Irritating to respiratory system and skin
- R39/23/24/25 Toxic: Danger of very serious irreversible effects through inhalation, in contact with skin and if swallowed
- R41 Risk of serious damage to eyes
- R67 Vapours may cause drowsiness and dizziness.

##### WARNING SYMBOLS used in section 2

- C Corrosive
- Xn Harmful
